

## Brain Function Matching

*Matching* – Match the part of the brain to its function

- |                  |                   |
|------------------|-------------------|
| A. Cerebellum    | G. Midbrain       |
| B. Frontal lobe  | H. Temporal lobe  |
| C. Thalamus      | I. Epithalamus    |
| D. Parietal lobe | J. Occipital lobe |
| E. Hypothalamus  | K. Pons           |
| F. Medulla       |                   |

- \_\_\_ 1. Controls heart rate, breathing, blood pressure, vomiting, and swallowing
- \_\_\_ 2. Vision
- \_\_\_ 3. Auditory, memory, cognition, olfactory
- \_\_\_ 4. Relay station for sensory impulses going to sensory cortex; senses whether sensation will be pleasant or unpleasant
- \_\_\_ 5. Limbic Center, regulates body temperature, water balance, and metabolism
- \_\_\_ 6. Contains pineal body and choroid plexus that makes cerebrospinal fluid
- \_\_\_ 7. Somatic sensory cortex
- \_\_\_ 8. Motor cortex
- \_\_\_ 9. Reflex center for vision and hearing and passes ascending and descending signals
- \_\_\_ 10. Control of breathing
- \_\_\_ 11. Controls equilibrium and balance
