

Ch12 Vocab: Write on notecards or type into Quizlet

Chromosomes  
Somatic cells  
Chromatin  
Sister chromatids  
Centromere  
Mitosis  
Cytokinesis  
Meiosis  
Interphase  
G<sub>1</sub> Phase  
S Phase  
G<sub>2</sub> Phase  
Mitotic spindle  
Centrosome  
Kinetochore  
Prophase

Prometaphase  
Metaphase  
Anaphase  
Telophase  
Cleavage furrow  
Cell plate  
Binary fission  
Origin of replication  
Cyclin  
Cyclin-dependent kinases (Cdks)  
Mitosis-promoting factor (MPF)  
Platelet-derived growth factor  
Density-dependent inhibition  
Anchorage dependence  
Metastasis
