

Nervous Disorder Research

Task: Pick a disorder or disease that is associated with the nervous system.

Research the disorder or disease using the criteria below and create a paragraph summary of your research. Post the paragraph to Moodle in the assigned location and then respond to 5 other people's posts using the criteria below.

Research Questions (10pts each)

1. What is your disorder/disease and who typically gets it?
2. What is the cause of your disorder/disease?
3. What are the symptoms of your disorder/disease?
4. What is the prognosis and treatment for your disorder/disease?
5. Include 2 other interesting facts about your disorder/disease.

Reflection Posts (10pts each)

- Read 5 other people's paragraphs and write a 1-3 sentence reply for each. You can use the article rubric reflection section as a guide to the types of responses you can make. If you respond to 15 or more people you will get 5 points extra credit on this assignment.
